EMPLOYMENT HISTORY

Web Developer

KROWDY

11/2021 - Present

A startup that provides digital recruitment services through the use of technological tools.

Tasks:

- Implement components of the design system from Figma to our library, based on Material UI.
- Layout and implementation of new functionalities with React, TypeScript, and Apollo Client.
- Implementation of events for business analytics of our digital products.
- Integration of services through REST and GraphQL APIs.
- Data modeling, creation of endpoints, and elaboration of migration scripts.

QA Analyst

KROWDY

04/2019 - 05/2020

Tasks:

- Implement the Scrum framework in the IT area.
- Control, planning, and coordination with the development and UX / UI teams.
- QA of the developed software (elaboration and execution of test cases, E2E automation with Cypress).
- Backlog management with JIRA, Trello, and Excel.

Planning assistant

HYDROMAQ

02/2018 - 01/2019

A company dedicated to the repair service and the sale of hydraulic, pneumatic, and electrical machines and components.

Tasks:

- Elaboration of processes, operational formats, and quality control.
- Update and management of database information.
- Assistance in planning and support for the correct development of operational activities.
