EXPERIENCE

Full Stack Developer   November 2021 – August 2022
Krowdy   *Lima, Peru*

- Built a 3-step login process by integrating scraping services for multiple job boards to enable easy importing and exporting of job and candidate data in the ATS, resulting in a significant monetization boost for the company.
- Collaborated with the design team to implement design system components from Figma into our library, based on Material UI, resulting in greater visual consistency, saved development time, and ease of maintenance.
- Built a dynamic pseudo chatbot to guide candidates through the application process, featuring user-friendly options for information and automated email reminders for key tasks, enabled by the execution of cron jobs.
- Implemented events for business analytics of our digital products with Mixpanel and Lucky Orange to help stakeholders with decision-making.
- Data modeling, creation of endpoints, elaboration of migration scripts, and integration of services through REST and GraphQL APIs.

JavaScript, TypeScript, React, Material UI, Apollo GraphQL, REST API, Node.js, Restify, Mongoose, MongoDB

QA Analyst   April 2019 – April 2020
Krowdy   *Lima, Peru*

- Successfully implemented the Scrum framework in the IT area from a more waterfall-oriented approach.
- Established and led 3 high-performing development teams, each with their respective product owner, scrum master, and metrics.
- Control, planning, and coordination with the development and UX / UI teams for more than 10 projects.
- Improved project quality and reduced development time by defining and executing over 500 test cases. Implemented E2E testing automation with Cypress.
- Managed the backlog and improved team estimation abilities using tools like Jira, Trello, and Excel.

Cypress, React, Scrum, Project management, Jira, Trello, Excel

PROJECTS

Kanban – *A task management app*

- Responsive and accessible web app with a light/dark mode toggle. Enables users to create, read, update, and delete boards and tasks, mark subtasks as complete, and move tasks between columns.
- Implemented form validations, hover states for interactive elements, and infinite scroll with virtualization for efficiently loading tasks.

Next.js, React, TypeScript, Prisma, ChakraUI, tRPC, PlanetScale, React Hook Form, Zod, Jotai, TanStack Virtual

Ecomvision – *Web app for data visualization*

- Read the most important data in an e-commerce dashboard. Explore and analyze relevant information in line, pie, and geo charts.
- Implemented aggregate calls, and client-side and server-side pagination for tables, providing efficient data transfer and fast loading times.
- Sort and filter tables globally or per column for easy data exploration and analysis.

Next.js, React, TypeScript, Prisma, ChakraUI, tRPC, MongoDB, Zod, Jotai, TanStack Table, nivo, Docker

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, SQL
Frameworks/Libraries: Next.js, React, ChakraUI, MaterialUI, Tailwind, Cypress, Node.js, Prisma, tRPC, MongoDB
Tools/Other: Git, Docker, Figma, GraphQL, REST API

EDUCATION

Universidad del Pacífico   Lima, Peru
Bachelor of Administration   *2012 – 2017*
